Height: 20 cm

- ▶ Roadway plates of reinforced concrete in B 45 with honeycomb pattern
- ▶ Load class SLW 60 according to DIN 1072 Suitable for heavy goods vehicle
- ▶ Various lengths available on request

DYKE AND GANGWAY PLATES

Fixing of dykes and gangways made from concrete have been proven for a long time, especially according to durability and high loadability. Beside lanes for agricultural vehicles, the installation of concrete plates is ideal for cattle drive routes, cycling and access roads. The road style remains rural and fits perfectly into the landscape. Rain water flows through the honeycomb rapidly, so that the ways remain passable in all weather conditions.

The long life, the low maintenance and the little repair costs make the fixing of dykes and gangways with concrete plates highly economical.

The illustrations may differ from the actual version.
Subject to technical changes.

Manufactured according to the requirements of DIN EN 12737
